

Nb Cavity EP Summary

- Thanks for all the comments to my drafts!!
- Contents
 - Brief history
 - Important parameters and issues
 - Present EP capabilities at the labs and companies
 - Ongoing R&D activities
 - Recent results and issues
 - Important future R&D items
 - Suggestions for global collaboration

Plan and Schedule (1)

- No details in this presentation. Please email tajima@lanl.gov, if you have not received my emails on this and want to receive this summary.
- The final version will be sent out this Sunday (5 February 2006) if there is no sudden request for tedious revision.
- Also, the summary will be posted in the EP Collaboration Web Page that will be created soon. Hopefully by Sunday or by the end of next weekend.
- If necessary, it will be revised again even after this final version.

Plan and Schedule (2)

- I plan to run a web site and send out weekly and monthly eNews from February 2006, i.e., from this week.
- Purpose of the web page and eNews
 - Expedite the EP R&D by:
 - keeping the researchers informed of recent results and problems
 - having an integrated place to be shared for a collection of important data, useful references and information

EP web page and eNews

- Web page contents
 - Important and useful references and information
 - New progress and results
 - Summaries of EP related meetings
 - Various announcements
 - eNews archive, etc.
- eNews contents
 - New addition to the web page, i.e., new literatures or new results and progress
 - Communication between researchers
 - Various discussion and meeting announcements, etc.
